INTRODUCTION

1. Purpose

This manual is created for AirTran's DC-9 aircraft maintenance program and support personnel. The manual has been made electronically available, as part of a department cost effective measures, which should provide easier information access and shared access capability.

2. Scope

This manual allows selection of three Airtran operation manuals for the following aircraft groups:

- i. Illustrated Parts Catalog IPC A/C 901-949
- ii. Illustrated Parts Catalog IPC A/C 939
- iii. Illustrated parts Catalog IPC A/C 965-967
- iv. Wiring Diagram Manual WDM 901-967
- v. Aircraft Maintenance Manual AMM A/C 901-949
- vi. Aircraft Maintenance Manual AMM A/C 939
- vii. Aircraft Maintenance Manual AMM A/C 965-967

3. How to Use This ETM

The ETM Master Manual List gives a choice of the manual types and A/C groups to view. By selecting the desired manual type and A/C group from the bookmark navigation pane, the manual chapter pages are accessible. For detailed information on how to navigate thru the three-tier directory structure click here  for directory help file.

4. AirTran Technical Publications Memorandum

M E M O R A N D U M

To: DC9 Maintenance Manual User

From: John Endicott, II
Manager, Technical Publications

Subject: DC9 digitized maintenance manual

Date: 10/29/2001

AirTran Technical Publications goal is to provide DC9 Maintenance Manuals, Illustrated Parts Catalog, and Wiring Diagram Manuals that are both user friendly and relevant. We hope that this revision will provide these factors. For us to continue to produce an effective product the end user must help us to continue to submit the Manual Suggested Revision/Correction form, AT-P012. This form will allow Technical Publications to make the approved necessary changes to these manuals. You will notice in this revision, and subsequent revisions, that many of the submitted change requests have been incorporated, as well as a new feature of a linking icon from the individual manual page to the corresponding supplement. AirTran Management and Technical Publications will continue to strive for using the latest in technological advances and hope these changes will assist you in your day to day operation. In the future you will see more changes incorporated to these and other AirTran produced/maintained manuals.

To submit a manual change request, use AirTran form AT-P012 (Manual Suggested Revision/Correction), which is available on line via the AirTran Intranet/Technical Publications/Online Technical Forms. If unable to access the Intranet the form is also available in the GMM or call Technical Publications for a copy.
